Product Bulletin

LANconnect Data Panels

The LANconnect range of data panels is being rationalised during Q3 2007 with associated new N808 part numbers. For example, panels such as the NT03.214 "LANconnect 24 Port FTP Patch Panel (3 white strips) Black" and NT03.213 "LANconnect 24 Port FTP Patch Panel (1-24) Black" will be combined into one panel having both white strips and numbers – under part number N808.2211.

In association with the panel rationalisation within the LANconnect range, there will also be two other changes. Fixing kits (cage nuts and screws) and the data earth connection method will be supplied as per current LANmark solutions.

- New Fixing Kit Components:
 - 4 x M6 x 12mm DIN 7985 4.8 Philips black
 - 4 x Cage nut

- New System Earth Connection:
 - 1x 3.5mm self tapping screw (DIN 7981 3.5mm x 6.5mm or ISO 7049 F-H 3.5mm x 6.5mm).
(N.B. No other screw type to be substituted for installation)
 - 1x M4 Locking washer DIN 6798A

The attached table provides information on existing part numbers, descriptions and replacement parts.

For stock availability of existing and new parts, please contact your Distributor.
